

Webstore

Northline's Intelligent Warehouse Management System, accessible from our website, makes it easy to manage inventory and ordering from anywhere.

Key Features

Main Menu

Simple menu options.

Real Time Inventory and Order Information

Access ordering and stock information in real time.

Customisable Stock Reports

Customisable stock reports to allow the customer to see exactly what is relevant to them.

Stock Availability

Visibility of available stock when adding product to orders.

Reports

View, download or export stock on hand and stock movements.

Product Movements

Trace all product movements in and out of the warehouse.

Goods Inwards and Outwards Generation

Easy to navigate entry screens for inwards and outwards order generation.

Historical Information

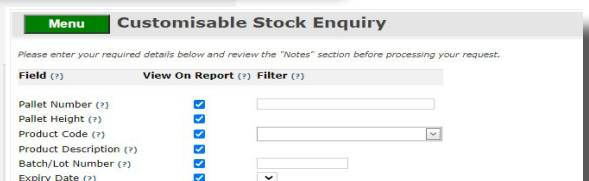

Ability to search for historical goods inwards and outwards orders.

Training for Customers

Northline offers training of Webstore via the following platforms as well as over the phone.

For further information please contact your Account Manager.
